SUPPLEMENTARY INFORMATION:

Agenda

The Scallop Plan Development Team (PDT) and Advisory Panel (AP) will review Framework (FW) 29 alternatives and analyses. The primary focus of this meeting will be to provide input on the range of specification alternatives. FW 29 will set specifications including ABC/ACLs, days at sea, access area allocations, total allowable catch for the Northern Gulf of Maine (NGOM) management area, targets for General Category incidental catch and set-asides for the observer and research programs for fishing year 2018 and default specifications for fishing year 2019. Management measures in FW 29 include: (1) Flatfish accountability measures; (2) NGOM Management measures; (3) Measures to access area boundaries consistent with potential changes to habitat and groundfish mortality closed areas. They will also make recommendations on 2018 scallop work priorities. The PDT and AP will discuss scallop related issues under consideration in groundfish FW 57. Other business may be discussed as necessary.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.
